EXPERIENCE

LIBERTY MUTUAL INSURANCE *Software Engineer Intern*

Wausau, WI

Seattle, WA

May 2017 - August 2018

- Implemented a full-stack web application and integrated it into the deployment pipeline
- Developed a web application to reduce excessive workspace set-up time for new hires; earning First Place and People's Choice Award in annual intern Hackathon event
- Took initiative and established a leadership role as the main communicator between the product owner, the designer, and the entire team throughout a three month long project

FREELANCE WEBDESIGN *Web Designer/Webmaster*

Milwaukee, WI

January 2014 - Present

- Designed and implemented a variety of websites in categories such as non-profit/manufacturing/personal
- Provided consultative services for a variety of consumers to deliver personalized and creative products that would be best suited to meet the consumer's individual needs and goals/outcomes

PROJECTS

SURE HOPE FOUNDATION *Website*

January 2014 - Present

Previously designed, and now currently managing a non-profit organization's website, which has assisted in raising \$10k towards a school in Uganda that aims to provide equal educational opportunity for children

ASK THE PROFESSOR *Web Application*

January 2018

Lead a team in the creation of a web application that allows for questions and answers between students and their professors, and the recording of such questions for future use
